

WFAC Report for APC Meeting – 8th September 2020

We were so sad to learn of the passing of Keith Mitchell CBE. Keith was one of the 'founding fathers' of the Milton Road sports and community project and had the idea to use this land as a sports field and worked with the late Charles Swain and the late John Harper to achieve this, which led to an approved planning application for pitches on the land in 2010.

Keith was also a trustee and original member of the WFAC group and had led on developing the financial elements of the project until he became ill. He was extremely passionate about the project and we are incredibly grateful for all his input and support. He will be greatly missed by us all and our thoughts are with Keith's family at this sad time.

The grass seed was sown in August at the Milton Road site, just before the rain came, and already the site is looking very green indeed.

We have a fantastic team of people who are busy fine tuning the Business Plan and who are also continuing work on researching grant funders.

Due to the pandemic we have had to make the difficult decision to postpone the Community Day this year. Other fundraising events later in the year will be dependent on Government guidelines.

Pam Haynes
On behalf of the WFAC group
